

SUSTAIN 360

THE FIRST OF IT'S KIND

30% PCR Machine Film

SUSTAIN 360
PERFORMANCE SUSTAINABILITY

- * 30% Post-consumer recycle
- * High performance, maximum containment, cast one-sided cling machine film
- * Polypropylene enhanced formulation engineered to minimize tears and puncture propagation.

REDUCE YOUR CARBON FOOTPRINT.

Use a film created with recycled materials and requiring less virgin resin.

ACHIEVE YOUR GOALS.

Meet your publicly stated sustainability objectives quicker.

SEAL THE CYCLE.

PCR stretch films complete the circular production cycle.

Sustainable Stretch, Unmatched Strength. Sustain 360 Machine Film – the 30% PCR Revolution.

SUSTAIN360

The ultimate in performance sustainable machine films.

- **Sigma's revolutionary 30% PCR one-sided cling machine film**
- **Developed from a best-selling Sigma formula to meet sustainability goals and provide reliable, consistent runnability for high-speed applications while maintaining excellent containment properties.**
- **Polypropylene enhanced formulation engineered to minimize tears and puncture propagation.**
- **Preventing pallets from sticking together during storage and transportation, our one-sided cling technology offers efficient and hassle-free handling.**
- **Perfect roll, edge profiles, and gauge consistency ensure top quality and performance.**
- **Recommended 200-250% stretch for most applications**
- **100% Recyclable**
